CBR0002 is a black stainless steel band with carbon fiber inlay and a gold channel on the center.

Unique Carbon Fiber Ring

Unlike ordinary rings, carbon fiber rings are black with a woven pattern on the surface, which can be found at a glance in various rings. It has a simple style, no fancy appearance, simple and stylish. The carbon fiber material is resistant to high temperature, corrosion, light weight, high strength, will not be easily damaged, and has a long service life. And the price is cheap, ordinary people can

afford it.

QL Jewelry is a professional carbon fiber ring manufacturer, we use 100% pure carbon fiber, and we can customize the size according to customer requirements. We can also make other carbon fiber jewelry, such as carbon fiber bracelets, carbon fiber pendants, etc. Carbon fiber jewelry is not common in the market now, but the market demand is increasing, and it should be popular in the future.

Titanium steel ring is a very special kind of metal jewelry, the texture is very tough, but it is very corrosion-resistant. It will not turn black like silver, and it will not be allergic to jewelry like copper, and it will not be like alloy jewelry. Because it contains lead and is toxic, stainless steel jewelry always maintains its own color tone for life at room temperature. The stainless steel jewelry is made of the same material from the inside to the outside, and has passed the artificial sweat test. Its characteristics are completely non-corrosive, and resistant to strong acids and alkalis, without discoloration, no fading, no allergy, no deformation, hard and bright. It is a green high-grade environmental protection jewelry that does not produce any side effects and harmless to the human body.

[**Black Carbon Fiber Ring**](#) combining the advantages of titanium and carbon fiber, the style is novel and the shape is very beautiful.
