The manufacture of modern Damascus steel greatly saves labor and costs. Forging and welding are used to stack steels with different carbon contents for heating, folding and forging until they are integrated, so it is also called pattern welded steel. Damascus steel made by folding and forging technology has more obvious pattern characteristics. This kind of pattern may be hidden or visible, and some of it can be revealed during forging, but under normal circumstances, it must be corroded by acid to appear.

# How to make Damascus

## Step.1

The original steel is pressed and stacked one by one, welded into a whole piece, and then forged at high temperature.

## Step.2

After being smelted into thin sheets, they are folded, twisted and pressed, and then forged again.

## Step.3

Such repeated folding and forging , greatly improved the toughness of the steel.

In addition to beautiful patterns, Damascus steel also has excellent durability and strong toughness. This unique combination of properties makes Damascus steel the perfect alloy for rings.

Pros of [Damascus Steel Rings](#):

A long and illustrious history as a warrior's metal.

Extremely durable and scratch resistant.

Unique patterns and eye-catching designs.

Affordably priced.

Easy to maintain.

We are an OEM factory. All details can modify according to customer's request.

### **Packaging & Delivery**

### Why Choose Us

- Price: Products are produced by our own factory, price is favorable.
- Quality: Years of production experience in cooperation with many international brands. Our workers are highly skilled with years' experience, you can see that from the excellent workmanship of our products. And we have very strict quality control, our purpose is : Zero complaint, Zero

returns;

- Delivery time: With large scale factory and strong productivity, delivery time is fast.
- Stocks: We have nearly 100,000 stocks for the most popular styles, small MOQ and delivery time for stock is within 3days.
- OEM & ODM Service: We are the expert in jewelry OEM & ODM services.
- Design and R&D: With mature designers and R&D teams, we continuously develop new products, new technologies and new materials.
- Service : Professional sales team ,timely response, 7 \* 24 hours service, quality after-sale.
